

Mobile Control

Data protection, policy compliance and device control for mobile devices

Give your users the latest mobile technology while keeping your organization's data safe. We help you secure, monitor and control iPhone, iPad, Android and Windows Mobile devices. With over-the-air control and a self-service portal that make mobile protection easy for everyone.

- Protects iPhone, iPad, Android and Windows Mobile devices
- Gives you a central web console to enforce consistent policies like strong passwords
- Controls which smartphones and devices have access to company email
- Lets you remotely lock and wipe devices to prevent data loss and ensure compliance
- Allows users to register and protect their devices with a self-service portal

Mobile Control

Keep your data safe and comply with regulations

With Sophos® Mobile Control, we let your users work with flexibility while on the move— no matter which mobile device they have:

- ▶ Protects your confidential data by letting you configure mobile devices in a consistent and safe way, including password policies and screen locking
- ▶ Controls access to your organization's email using Microsoft Exchange ActiveSync Proxy, which makes sure only compliant devices have Exchange Server access
- ▶ Controls the use of features or apps, like games or Bluetooth, that could lead to productivity concerns, data breaches or compliance issues
- ▶ Lets admins or users remotely lock devices and wipe data in seconds if a mobile is lost or stolen

Manage iOS, Android and Windows Mobile

Say yes when people want to use the latest mobile devices, safe in the knowledge you can keep them secure:

- ▶ Allows only secured and registered devices to access your organization's email servers
- ▶ Lets your IT administrators manage all supported smartphones and tablets from one web-based console, regardless of operating system, service provider, network or location of the device
- ▶ Provides over-the-air setup and configuration so you can control devices from anywhere, at any time

Mobile security that saves you time

We make things much simpler for your IT staff and provide a good experience for your users, too:

- ▶ Reduces help desk calls with self-service portal to let users handle routine tasks on their own, such as activating a new mobile device, doing a data wipe or locking a lost phone
- ▶ Gives you an at-a-glance mobile inventory by recording all registered devices, configuration settings, serial numbers, model numbers and hardware details
- ▶ Lets you deploy and remove apps as well as send text message alerts to groups of devices in a couple of clicks

Mobile Control
